*The Healing of Music, Uncle Sam*

I Love Art In all forms, Music, painting, tattooing and sculpting. Throughout my life I've worked Art into wood floors, building motorcycles and writing songs. The feeling of creating something that starts out as a blank canvas and morphing it into what you see in your mind is the Rush for me. you can lose a lot of yourself Both mind and physically in prison and art for me is a hunger that pushes me to create life where its easy to feel death. I dont have one thing that use to get inspiration from, I generally go on the moment of what hits me. When I started I used to stride in finding a style, But found I'm content finding success and failure on the Journey exploring new avenues and mediums. Thank you so much for reading this and coming here to view the art. Stay Gold - Nino
