

Artist Name: Lundquist "Nubbz"

— Nesting Frog - Each box with lid nests nicely inside a bigger box all the way up until you have 15 boxes inside the last largest box. When put together this $4 \times 4 \times 2$ box is heavy and solid.

In prison we get stacked so close together sometimes I feel like we are all just Nesting Dolls.

— Inge Ang the Rabbits - Each made from one piece of paper, Purple on one side Orange on the other. Approx $9" \times 18"$. No scissors, No glue. These bold rabbits are said to bring luck

— Exploration - Made from a single rectangle $3.75" \times 18"$ folded into shape without cutting or glueing the paper.

— Theoretically - Made from 55 3in squares. The inner ball is a 12 sided dodecahedron.

Picture the center of the universe peeling like an onion and popping like a balloon, over and over again. Just a theory
