Just a few short decades ago, women were unable to get legal, SAFE Abortions. Roe v Wade helped keep medical treatments safe, legal, and confidential.

Why ~~are~~^{are} these antiquated ideals of so many male legislators allowed to dictate what a woman does with her body? What happens to doctor/patient confidentiality? What about exceptions for rape, incest, or extreme medical conditions the mother or child may have?

Let's not go back to a time when women resorted to unsafe, illegal abortions. Let's not put a woman's choice down to risking her own life or future children she may decide to have.

If the shoes were on the others' feet, would this even be an issue? I think not. Men should not be allowed to tell a woman what she is, or isn't, allowed to do with her own body and her own health.
