Circles

This is a "Zia" (Tentangle inspired art). The name of this piece is called Circles. Each circle has a different pattern and it's in multiple colors. It is an abstract representation of the circle of life, and how we are all different, from different backgrounds, different colors, to different personalities. Sometimes our circles over-lap and end up creating a blank space in our lives. I hope everyone enjoys this piece and what it represents as much as I do; come up with what it means to you.

Enjoy!
