I love that art is EVERYWHERE and in EVERYTHING! I love that Art allows anyone to take creative license and express themselves, regardless of their skillset, background, race, religion, or anything. Art can be a common ground for people and I love that platform it provides.

Every piece of Art I create is Symbolic in one way or another and comes from a deep desire to express a feeling, or thought. Elephants hold a special place in my heart given their unique character traits because those same traits I identify with in many ways, mainly their Big hearts, and Impeccable Memories. I hope you enjoy my art and that you are able to feel the intention with which I created it.

P.S. I Love You Erika
