At 47 years young, I have been into art for as long as I can remember. In 1996 I started my career as a tattoo artist. Over the years, I've won many awards, travelled to many places, and have been inspired by many people.

Most of the artwork that I create now is "tattoo" style art, but I also enjoy painting realism in oil and watercolor.

I am currently working on a book of my illustrations, sketches and designs, that I hope to complete in 2020. I am widely known for having my eyes tattooed. Can't miss me! I also tend to use a lot of "eye symbolism" in my work, because the most important tool to any artist, is that which he sees through.

"To create, is the light in an otherwise dark world."
