Travel With Me, Patch Work

I have really needed to think about what to write this year. I have been, you could say, a little ugly this year. I was diagnosed with a rare form of cancer in May of 2018 that chemo does not work on. And the treatment they had me on is not working as they had hoped it would.

So now I wait for another treatment at your hospital. Do not feel real bad, without treatment the life expectancy is about 3 years.

I say this to show that I did try other ways of doing my work. I really hope you like the animals, figures, and butterflies I incorporated into my work.

Thank you to any who decide to purchase my work, and I would love some feedback on it.
