

Artist Name: Dameon Spencer

Created from repurposed single use plastics, worked into the image of the earth as a skull on fire over the backdrop of the MDOC Environmental & Waste Management Policy, and an intense desire to bring awareness to the problem of practicing environmental responsibility while incarcerated "Recycle or Die" is a plea for Help.

Since becoming incarcerated I have witnessed an immense amount of unnecessary waste with virtually no option to contribute to less harmful waste disposal and recycling options. This led me to research more into the problem and potential solutions, which in turn led to the idea for this project. I hope to bring awareness to this issue and gather support for implementing these solutions in the near future.

Also I plan to donate the proceeds from the potential sale to One Tree Planted, a nonprofit that plants one tree, in biodiverse forests, for each dollar donated.

Thank You
