

Artist Name: Jonathon C. Jones

I often sit in the lawn in the yard and watch the bees land from flower to flower. I see the Ants working on their homes one sand grain at a time. I watch the birds fly around and play their games. I sit and read books by Einstein, Feynman, Nels Bohr, Frank Wilczek and others on quantum mechanics, g.e.d., q.c.d and relativity. I bring a small picnic with me to my spot in the grass and ponder life in the most profound ways.

Life is Art, The Universe is Art, Reality is art. I am also a musician. I play rythm guitar and sing songs. No matter what form of creativity I am expressing, I invoke the ~~beauty~~ beauty of the world and all of my experiences. The universe is beautiful no matter where you are in life. Its up to us to make it what we want it to be. My Artwork reflects beauty, humor, love and peaceful feelings inside of me. All of my Art is Freehand with no grid. I am self taught in all of my Arts and passions. I have been drawing for 3 years now. I hope you enjoy them as much as I enjoyed doing them.
