

Artist Statement: (Sixth Sense)

I can't tell you the first time I started draw, but I do know it started when I was just a child. I can imagine, one day I drew up on the formless substance with a thought, that thought created a vision, that vision was a piece of paper and a pencil, and through the inspiration of the sixth sense I started to create, I started to draw what was there, with ease and no effort at all, patience was my only distraction.

The sixth sense is the moving forces of life. In 2002 I graduated from Blackstone Career Institute as a Legal assistant Paralegal. I drew up on the formless substance with this thought, this thought created a vision, having faith in this vision the sixth sense gave the inspiration that was needed to complete 31 examine.

So from my world within, I give you the infinite good of me. I give you my authentic self.
