

Artist Name:

Well it's that time of the year and I'm super excited! As you know I love what I do which is expressing myself and bringing happiness to people through my artwork. At heart I am a graffiti artist but over the years I have grown and become more versatile but I always go back to my colorful wild side. I mixed it up this year focusing on precision, intense color combinations, and a modern, new wave style with my own twist. I had a blast putting these pieces together. The pieces are a good representation of me and if you have seen any of my other pieces you will see that I am constantly evolving. I am looking forward to having my work on display knowing people will be looking, talking, and developing feelings about my pieces, that is a huge motivator for me. This up and coming 29th Exhibition is going to be amazing and as long as this keeps going strong I will be involved for the remainder of my time, hopefully I will be able to participate/help in other ways when I'm out. Uof M and everyone that comes keep the light lit for us at the end of the tunnel. Enjoy, have fun, and keep coming and trust me, with so much talent tucked in one place you will not be disappointed.
