

Artist Name: Kim Lea Emig
Kentucky Hill Cottage

Fabricated out of Spit Tongue blades & craft sticks. I collected the stones off the softball field "one at a time." I used Acrylic Glaze to make a shine. The ~~cut~~ windows are cut from a shower bag and stitched thru the chipboard. I enjoy building these houses. Last year I submitted a Piano w/bench built out of all tongue blades. I've built all things from wood. House, Frames, Lighthouses, jewelry boxes. You want something special; send me an E-mail with pictures of what you wish constructed — and I'll make it happen.

Sincerely,

Kim Lea Emig
