Avalokitesvara, Pablo

(+) Production (+) Reception (+)
Spiraling concertine razors,
In the moment of egress,
Manuever receptive perception
Into clockwork darkness.
Everything is becoming
Within the elements of Kaos -
Flesh, blood, spirit, light -
The antipodes of consciousness.
The will of (-) molecules
Possess a gravity (onerous) -
(+) / (-) ions in the aether -
As seconds, minutes, hours progress.
O my brothers (+) sisters, know this:
It is collective darkness, V us -
And your light is the synthesis
of spinning, consolidating, becoming vertices.
The production (+) reception of love.
