

Artist Name: Richard Hartwick

my art is Zentangle. Zentangle is an abstract, meditative art form. It is comprised of a series of repetitive strokes that can be complex or simple. In its traditional form it uses only black ink and graphite. When color is added it is called Zentangle Inspired Art (ZIA).

I started Zentangle 4 years ago, at age 72, with no previous art experience or ability. When tangling I am relaxed, focused, and creative.

When I create art my objective is to inspire, share joy, and bring peace to the viewer. I try to do this with images as well as written message.

I hope you enjoy it.
