Hopeful

This is about the transformative
of Butterflies. So, I just wanted to
pay homage to the women in my family
who've lived and died because of Breast-
cancer. And the women who are touched
by this disease. And because Transforma-
tion is a "process" that does often end
in a more beautiful strength. E.g. Many
cancer survivors only learn through con-
quering the disease how strong they
are. And there's beauty in their
strength.
