The Green Zone

as a person, art used to be not only a hobby for me. ~~4~~ BUT also my favorite subject in school. but in Junior high I entered the foster care system and art became a thing of the past. for over 15 years I have done nothing artistic except paint cars. it was not till a couple of months ago, my cell mate told me about the pcap program and sparked my interest. I had nothing except some pencils and decided to draw a picture of something I like very much. "bud" and being V.O.F.M and ann arbor, home of hash bash, I found it very fitting. I hope you all enjoy the art as I did drawing it. and I also plan to continue participating in this splended program.
