

Artist Name: Byron Bowditch

I built this art piece to occupy my idel time.

I was inspired By my 9 year old Grand son to keep me busy and build something different that could be usefull By saving a little money to create other Items.

The idea of this piece was From a small house I Lived in when I was younger here in northern Michigan.

There are two Storage spots on this House one under the front Steps and one under the back deck. The coin's drop threw the Top of the Chimney into the House and can be retrieved from The Bottom of the base.

The color choice's were chose From other northern Houses around Michigan with a hint of Dept of Natural Resources colors.

The Style is a mixture of Houses of Modern as well as older Buildings around the State.

I hope others will find that Building these Hobby Craft Items are a very Stimulating and usefull Tool especially for Someone Like myself, I have ADHD and it helps considerably with my daily routines.

Thank You Sincerely,
Mr. Bowditch #268374
