Cradle of Life and Death

The Cradle of Life and Death represents life, the world, the universe as a whole. Death reigns supreme over us all. All things, regardless of Race, Religion, Social status must eventually face death. In the between time of birth and the Ultimate are the blocks that build our society. Our genes, our civilizations we build, the conspiracies and the monuments we erect to those beliefs. All is a shadow of the former and all is a part of life.
