

Tim Hull
22-20
Gazeboe

I have always been good working with my hands. At 3 yrs old I removed the door of my mothers oven and told her I was fixing it for her. I was very mechanically inclined as I like to work with my hands in school I did well in classes working with jewelry, leather, sheet metal, welding, electronics, drafting, wood shop, ceramics, sewing, automobiles and the like. I started working with sticks out of necessity for a hustle in prison as wages are sparse and it was a more fulfilling use of my time than watching tv. I am seldom satisfied with the quality of my works as I don't have proper tools + equipment to use. I came up with my gazeboe design at the request of a friend as at the time no one else was making them and he liked my work.
